CUSTOMISE

Unbeatable
range of design
options

Whether you are using Classic roof for a conservatory, orangery or home extension, you'll be able to achieve your design aims with this system, which uses the latest roof and glazing technology to deliver results that are both aesthetically and practically outstanding. Classic roof is available in uPVC or Aluminium and with a choice of many performance glass specifications in sizes from 24mm through to 35mm.

Add thermal efficiency and style to your Classic roof with an insulated pelmet and central lighting panel internally, along with a Cornice at the external roofline. Classic roof and the cornice are available in any colour to match or contrast with your window frames.

It is Ultraframe's policy to continually seek to improve its products, processes and service and we reserve the right to change specifications without prior notice. We have been trading for nearly 35 years and strive to deliver unrivalled quality and service.

THE BEST OF **BOTH WORLDS**

Livinroof seamlessly combines stylish grey panels with glazing to **create a stunning hybrid design.**

THE BEST OF **BOTH WORLDS**

Livinroof seamlessly combines stylish grey panels with glazing to **create a stunning hybrid design.**

Exceptionally stylish, the thermally efficient urban grey panels of Livinroof are guaranteed to add a real wow factor to your home creating a unique, warm, bright space with plenty of natural light. With the ability to be built in almost any shape or size Livinroof offers you the ultimate in design flexibility as you can insert shaped glass anywhere in the contemporary grey roof.

BRIGHTEST

More glazing options than any other solid roof

LIGHTEST

The lightest solid roof on the market

FIRE TESTED

Independently and fully fire tested

SAFEST

The only solid roof engineered to postcode

WARMEST

Unrivalled thermal performance

VERSATILE

The most configurable solid roofing system available

This hybrid design weighs only 31Kg/M2 and will allow the perfect amount of light to enter the room exactly where you need it most. What's more, the roof is very well insulated, giving you a room that's warm all year round and thermally efficient with a U-value as low as 0.16,

Livingroof enables designs not easily achievable with other roofing systems. Internally the Livingroof is stunning with a magnificent vaulted ceiling and an internal pelmet around its perimeter, where lights can be installed.

It is Ultraframe's policy to continually seek to improve its products, processes and service and we reserve the right to change specifications without prior notice. We have been trading for nearly 35 years and strive to deliver unrivalled quality and service.

Transforming light and space

UltraroofTM
By Ultraframe

Warm, bright beautiful spaces by Ultraroorf

Conservatory replacement | New extensions

✓
A warm, cosy space throughout the seasons

✓
Engineered to postcode

✓
The lightest tiled roof on the market – only 38 kg/m²

✓
Unrivalled thermal efficiency – U-Value of 0.17

Transform your conservatory

Transform your conservatory into an everyday room that is consistently the same temperature as the rest of your home.

Whether you're simply replacing your conservatory roof, upgrading your window frames too or completely re-building your conservatory, Ultrarroof is the ultimate solution and preferred by 8 out of 10 homeowners vs leading competitors.

Lightweight and structurally sound

Ultraframe's specialist software ensures that every Ultrarroof is structurally engineered to withstand the worst potential wind and snow loads for your specific full postcode – providing you with complete peace of mind, whatever the weather.

With a tiled roof, it is important to consider the exact location in which it will be installed and that the extremes of weather are taken into account during the design process.

After a heavy snowfall, snow places considerable weight on the roof and this will be less likely to melt on a highly thermally efficient tiled roof than it would be on a glazed conservatory roof.

It is vital, therefore, that the original glazing bars that were designed for glass are removed and that the roof is lightweight so the frames are not overloaded and able to withstand the weight of the snow.

Create a stunning home extension

Bringing plenty of light into your adjoining rooms, Ultrarroof is the ideal roofing system for your home extension.

Ultrarroof's stunning interior features an internal pelmet which is the perfect place to house downlighters or speakers. Plus, no matter what style or shape, Ultrarroof never needs a tie bar – Ever. This means that the interior will always feature an uninterrupted vaulted ceiling, which further adds to the sense of space.

On the outside, Ultrarroof can be personalised with a decorative cornice, an external soffit, and a choice of three lightweight tiles or more heavier tiles to match your home.

Super strong for Grand Designs

Ultrarroof is designed for large spans of bi-folding doors and can span up to 4m unsupported. The integrated full length glass panels in the roof ensure your extension and any adjoining rooms are flooded with natural light, or if you prefer, Velux windows can be added.

* Based upon overall appearance Survey conducted Feb 2019 with 64 x UK Homeowners.

Tiles

Authentic looking replica tiles

Starter strip

The tile starter strip – provides an authentic slate look and ventilation

Expandable panel

The expandable Ultrarroof panel expands to fill any gaps in the roof to prevent cold spots

No Tie bar

Ultrarroof creates a beautiful vaulted ceiling and never needs a tie bar - Ever

Bi-folds doors

The Ultrarroof beam is strong enough to accommodate large sets of bi-fold or sliding doors up to 4m without additional support

Framework

Combining the best of timber and steel construction technology, the framework is engineered to postcode, ensuring all critical load points in the roof are built to withstand extreme wind and snow loads for your specific postcode

Ridge

Fully insulated ridge

Glazing

Full length glazing

Hips

Slimline aluminium hip and ridge cappings

Box beam

Fully insulated box beam eliminates the risk of condensation

Pelmet

Internal pelmet for downlights and speakers

Insulation

Structural insulation within the timber and steel Ultrapanel helps the roof deliver a U-Value of 0.17 or better

External soffit (A variety of widths available)

Soffit

Complete peace of mind

In order for your tiled roof project to run smoothly and on schedule, you need a roof you can trust.

Ultrarroof is fully tested and compliant to both Building Regulations and the latest fire safety standards. Not only this, but Ultrarroof is also the fastest to build and the most thermal efficient tiled roof on the market.

Fastest to build

Because Ultrarroof is precision engineered and pre-manufactured to your specifications there is no cutting, trimming or battening required. Put simply, this means less mess and disruption for you as Ultrarroof is built much faster than other systems or a traditional roof.

Fire tested

Independently and fully fire tested

- Components AND complete structure both fully fire tested.
- **Fire test certificates** available online
- **Fire rated as B-roof** according to EN 13501-5: 2016
- **Fire rated as AC** according to BS476-3:2004

Warmest

- Retains warmth in winter
- Keeps your room cool on a hot day
- U-Value **0.17** even with glazing panels
- Option to reduce to 0.13 if required
- **Complete warm roof system**, with no cold bridging
- **Fully insulated** 380mm structural beam
